A complete guide to diving in contaminated water

The ERD Contaminated Water Ops Instructor trains and deploys his team members into bodies of water that could contain chemical or biological matter. The ERDI Diving in Contaminated Water Ops Instructor component shows instructors the proper techniques for teaching team members how to handle divers and equipment that has been exposed to contaminated water.

- Weight system
- Surface signaling devices; 1 audible and 1 visual
- Logbook
- USCG approved personal flotation device (PFD)
- Gloves: latex or work
- Dive tables
- Buoyancy compensating device
- Compressed gas cylinder

***Why a Team of Three:**

The optimum team structure is four, but this is not always feasible or possible. ERDI standards require a minimum team structure of three. With a team of three you can have: one diver, back-up diver (diver at 90) and a tender/supervisor. What qualifies as a team of three for this special: a team of three members of the same department or team. Divers from different municipalities, departments or teams cannot form a team for the purposes of this special pricing.
