1045 NE Industrial Blvd.  
Jensen Beach, FL 34957

**Cost:** \$499 Individual  
\$449 Team\*

**Includes:** Course materials, lunch, snacks and beverages, and ERDI certification

\*per person. min 3 from same dive team courses provided by ITI Technical Training

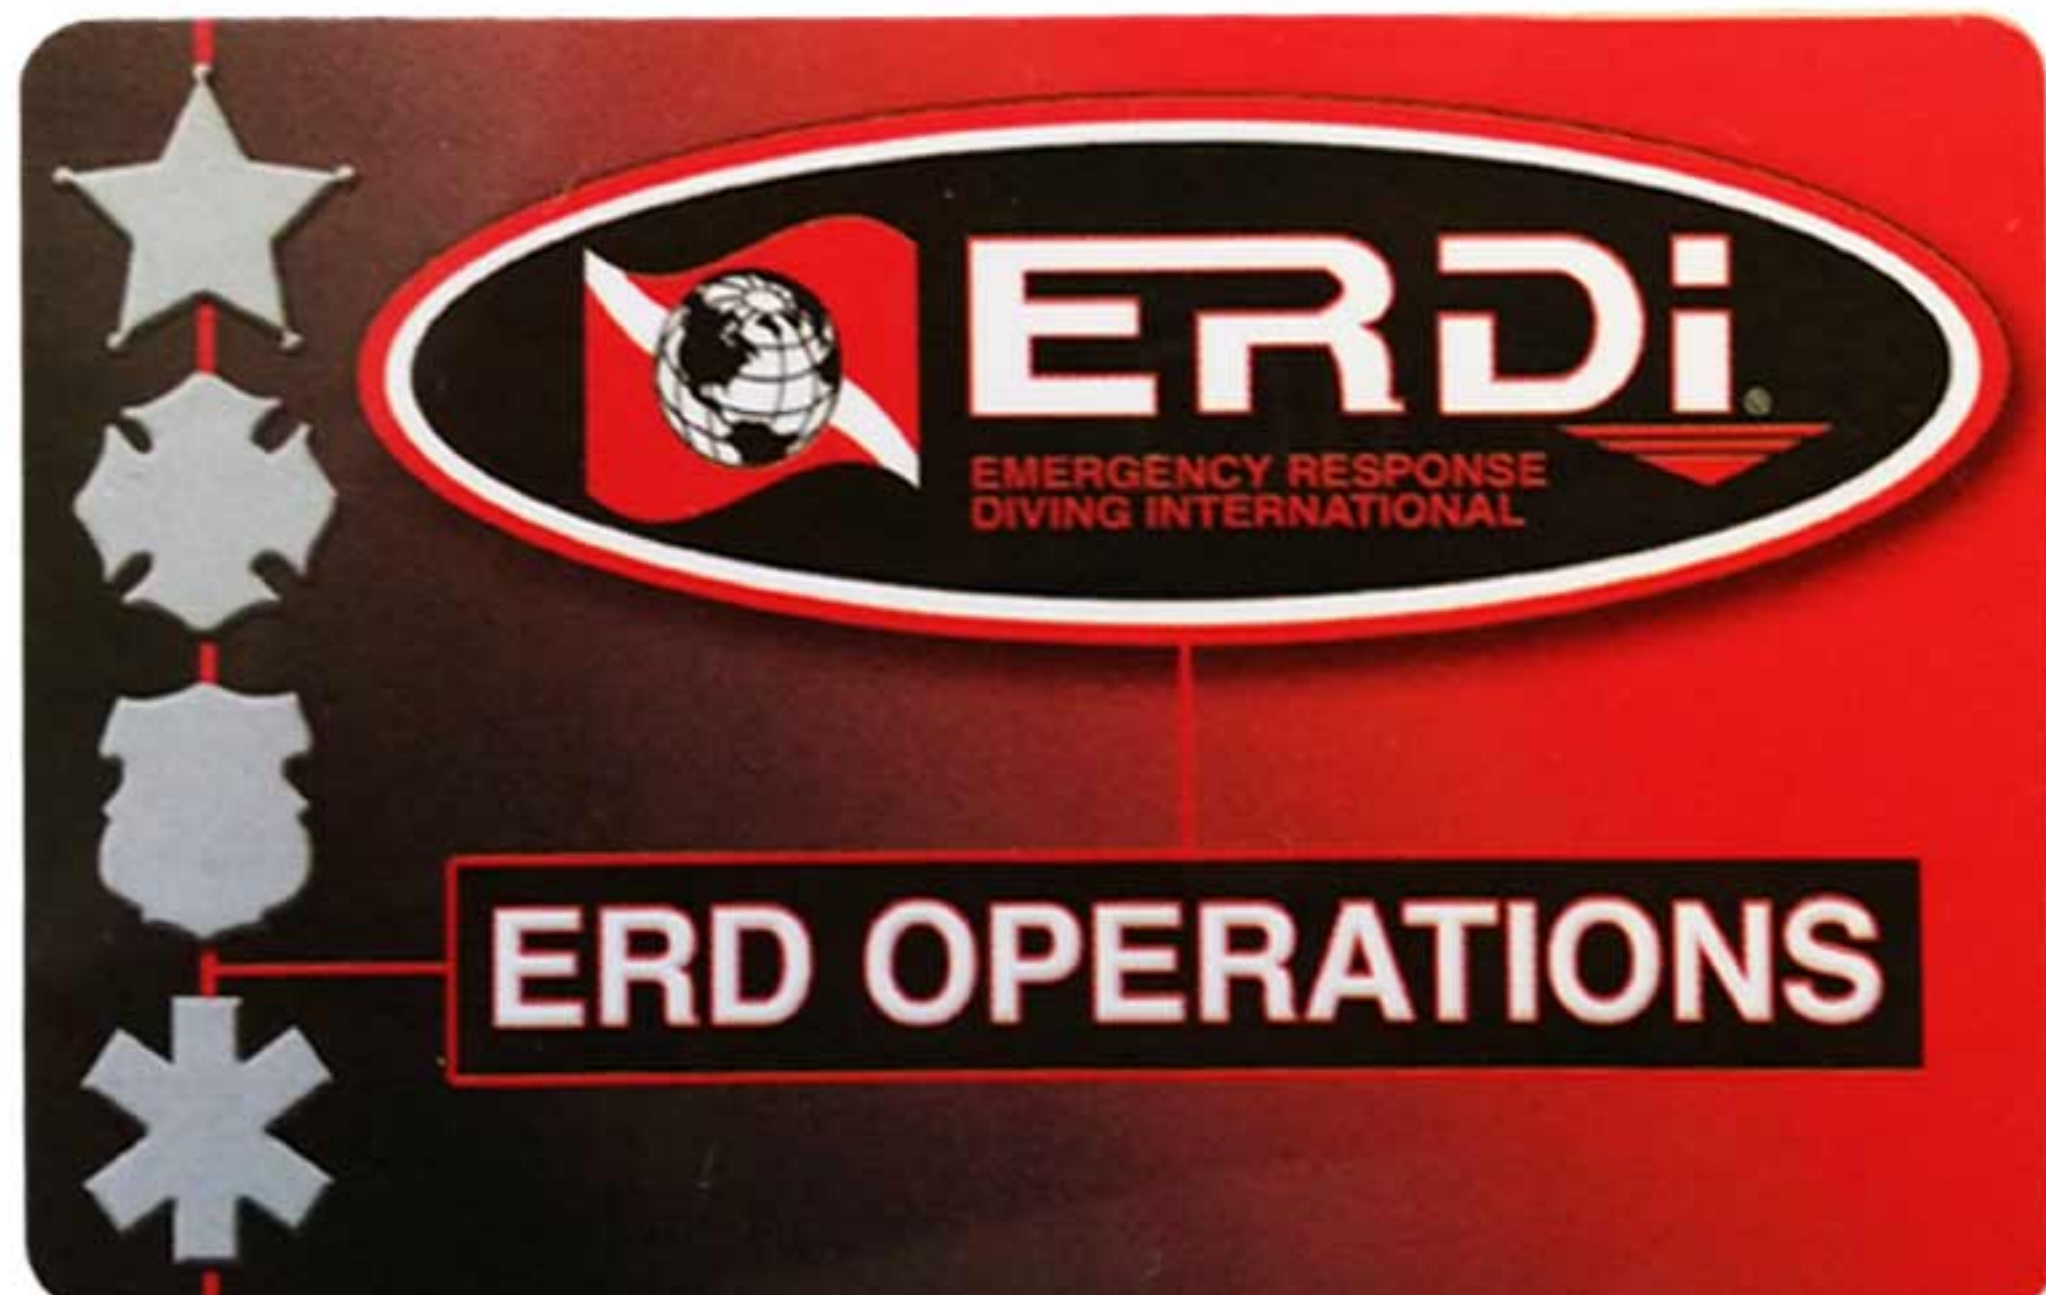

#### A complete guide to diving in contaminated water

The ERDI Diving in Contaminated Water Ops Component is one of the most challenging public safety diver training programs. Divers should be prepared to spend long hours in their personal protection equipment (PPE), demonstrate proficiency of all contaminated water skills and techniques, complete dives and decontamination procedures with a high levels of awareness.

# ERD Contaminated Water Ops Course

## Who this course is for:

- Any PS diver that enters a river, stream, pond or lake and disturbs the bottom
- Any PS diver that enters the water where a vehicle, light aircraft or human/animal remains could be
- Any PS diver who is not familiar with the four generally accepted classifications of contaminated water

## What you can expect to learn:

- How to prepare for contaminated water before you enter
- What to do once you are out of the water
- Proper cleaning, storage and maintenance of your PPE

**What's in it for you and your team:** operational safety and awareness training, more tools for environmental risk assessment, discussions of short and long-term health benefits.

## ERD Contaminated Water Ops Technician level minimum requirements:

- Perform mastery of skills on confined water session
- Demonstrate proficiency during two dives with minimum 30 minute bottom time
- Execute proper post dive decontamination and assessments

# ERD Contaminated Water Ops Course

## **Equipment Needed:**

- Mask and a pair of fins
- Primary regulator and secondary regulator
- Submersible pressure gauge
- Depth gauge
- Underwater compass
- Underwater timing device
- 2 Knives or cutting devices
- Exposure suit adequate for training conditions
- Weight system
- Surface signaling devices; 1 audible and 1 visual
- Logbook
- USCG approved personal flotation device (PFD)
- Gloves: latex or work
- Dive tables
- Buoyancy compensating device
- Compressed gas cylinder

## **\*Why a Team of Three:**

The optimum team structure is four, but this is not always feasible or possible. ERDI standards require a minimum team structure of three. With a team of three you can have: one diver, back-up diver (diver at 90) and a tender/supervisor. What qualifies as a team of three for this special: a team of three members of the same department or team. Divers from different municipalities, departments or teams cannot form a team for the purposes of this special pricing.
