***Why a Team of Three:**

The optimum team structure is four, but this is not always feasible or possible. ERDI standards require a minimum team structure of three. With a team of three you can have: one diver, back-up diver (diver at 90) and a tender/supervisor. What qualifies as a team of three for this special: a team of three members of the same department or team. Divers from different municipalities, departments or teams cannot form a team for the purposes of this special pricing.
